Today's International Current Affairs:

1. US Senate confirms Ketanji Brown Jackson as US Supreme Court Judge, first Black woman to be elevated to the post

- The US Senate has confirmed Judge Ketanji Brown Jackson for the Supreme Court in a largely partisan vote.
- The Senate voted 53 to 47 to confirm Judge Ketanji Brown Jackson, making her the first Black woman elevated to the Supreme Court.
- Three Republicans joined Democrats and independents in supporting Jackson to be the first African American woman on the highest court.
- President Joe Biden termed Jackson's confirmation as a historic moment for the US.

Science & Technology Current Affairs:

1. IIT Madras Launches 'Kadam', India's First Indigenously Developed Polycentric Prosthetic Knee that Can Bend More-

- Researchers at the Indian Institute of Technology (IIT) Madras have launched India's first indigenously developed polycentric prosthetic knee, which aims to improve the quality of life for thousands of above-knee amputees.
- Called Kadam, the prosthetic knee has advantages over a hinge joint because of the multiple axes of rotation, which provide the user greater control over the prosthesis while walking and maximum knee flexion of 160 degrees to make it easy to sit in cramped spaces like buses and autos.
- It is designed for durability with high-strength stainless steel and aluminium alloy along with hard chrome plated EN8 pins and high fatigue life polymer bushings.
- Indigenously developed Kadam is affordable and, at the same time, of high quality and performance, complying with ISO standards, including 30 lakh cycles of fatigue testing.
- It provides stability, reduces the risk of stumbling, and its patented geometry is specifically optimised for use on uneven terrains.

1. DRDO conducts successful flight test of Solid Fuel Ducted Ramjet

- Defence Research and Development Organisation, DRDO successfully flight tested Solid Fuel Ducted Ramjet (SFDR) booster at the Integrated Test Range, Chandipur off the coast of Odisha.
- The test successfully demonstrated the reliable functioning of all critical components involved in the complex missile system and met all the mission objectives.
- The Defence Minister said, the SFDR-based propulsion enables the missile to intercept aerial threats at very long range at supersonic speeds.
- The SFDR has been developed by Defence Research and Development Laboratory, Hyderabad in collaboration with other DRDO laboratories such as

Research Centre Imarat, Hyderabad and High Energy Materials Research Laboratory, Pune.
